Data Scientist | ML Engineer | Data Analyst

SUMMARY

BS Software Engineering student, results-driven Data Scientist, ML Engineer and Data Analyst with end-to-end expertise in building ML pipelines from raw data wrangling to production deployment. Expert at translating complex datasets into actionable business insights through rigorous data storytelling and predictive modeling. Active Kaggle contributor with 15+ published projects spanning classification, computer vision, NLP, and time-series forecasting.

EDUCATION

National University of Modern Languages Islamabad

Bachelor's, Software Engineering

Currently in 4th Semester

September 2024 - June 2028

GPA: 3.83

EXPERIENCE

CodeAlpha

Data Science Intern

May 2025 - August 2025

Remote

- Worked on end-to-end data science workflow including data cleaning, preprocessing, and exploratory data analysis (EDA) using Python Libraries
- Applied statistical analysis techniques and developed predictive models using data to generate actionable insights for data-driven decision-making
- Created impactful data visualizations using Plotly, Matplotlib, and Seaborn to communicate trends and support analytical findings

PROJECTS

Scene Classifier — ResNet-50

- Accuracy: 96% · Top-2: 99%
- Transfer learning on 25K images, Grad-CAM + Docker + FastAPI

Sentiment Analysis — NLP

- F1: 0.91 · Accuracy: 92%
- TF-IDF, BiLSTM, and fine-tuned DistilBERT on 50K IMDB reviews

Fraud Detection System

- AUC: 0.992 · AP: 0.88
- 284K transactions, 0.17% fraud · XGBoost + SHAP explainability

COVID-19 EDA Dashboard

- Global trends, wave analysis, 3 Plotly dashboards + Prophet forecast
- 50+ Visualizations · 90-Day Forecast

RESEARCH INTERESTS

- Explainable AI:** Interpretable machine learning models for transparent, trustworthy decision-making in real-world applications
- Computer Vision:** Applying deep learning techniques to solve real-world perception and recognition problems
- Natural Language Processing:** Large Language Models, transformer architectures applied NLP for low-resource languages

SKILLS

- Programming:** Python, SQL, C++, Java, HTML/CSS, JavaScript
- Data Science:** Predictive Modeling, Data Mining, Time Series Analysis
- Machine Learning:** Deep Learning, Neural Networks, Model Deployment, Computer Vision, NLP

- **ML Frameworks:** TensorFlow, PyTorch, Scikit-learn
- **Data Analysis:** Pandas, NumPy, Statistical Analysis
- **Soft Skills:** Problem Solving, Self Learning, Team Collaboration, Communications

LANGUAGES

English — Professional

Urdu — Native

ACHIEVEMENTS

- Achieved **Notebooks Expert** status on Kaggle, demonstrating high-quality contributions to the data science community
- Maintains a **CGPA of 3.83/4.0** in BS Software Engineering at NUML Islamabad, consistently among the top students in the program

CERTIFICATES

- IBM Data Science Professional Certificate (2026)
- Kaggle Data Science Certificate (2025)
- Data Science Intern CodeAlpha (2025)
